

As a life long citizen of CT, I urge you to vote NO the the assisted suicide bill.

This bill claims to "aid" a person. This is not true. It instead allows a doctor to write prescription for pills for a patient to obtain from a pharmacist that will essentially poison a person to death over minutes, hours or days, most likely without a doctor anywhere in sight.

This is WRONG for the ill person, the doctor and the pharmacist. There are no winners in this situation.

Thank you.
